Subscription Order Form

#	BP-PO-202501191101	**Expires**	January 21st 2026
Botpress Legal Entity	BOTPRESS, INC. a Delaware Corporation having its registered address at 131 Continental Dr, Suite 305 Newark DE, 19713 DE	**Botpress Postal Address:**	200-400 Boul De Maisonneuve Ouest, Montréal, QC, H3A 1L4, Canada
Subscriber	Scalex LLC	**Term Start** YYYY-MM-DD	Signature date below
Address	20024 Ronsdale Drive, Beverly Hills MI, USA 48025	**Length of Term**	1 year
Contact Name (S)	Alex Rochlitz	**Payment Terms**	The Client shall be billed monthly in advance on the first (1st) day of each calendar month. All fees are payable by credit card, and the Client hereby authorizes the Company to automatically charge the credit card on file for all amounts due under this Agreement.
Contact Email	alex@yourscalex.com	**Currency**	USD
Billing Email	alex@yourscalex.com		

Workspace ID wkspace_01KCYMP0188JKY90CF7W0TYA33

Subscriber acknowledges that this Order Form covers the following scope:

Subscription	Details	Price
Type	Managed Plan - >10 monthly maintenance	$17,940
Prepaid AI spend**	Annual budgeted AI spend (TBD; see T&C 6)	$0
Botpress subscription	***TOTAL (Annual subscription)***	**$17,940**

Docusign Envelope ID: F28F22CF-C6A1-4BCA-9EB2-7177392DD0ED

botpress

Subscription Order Form

Botpress Subscription entitlements (not to exceed)	
Bots	3 included
Bot Invocations: triggers, incoming msg	50,000 / Monthly
Collaborators	3 seats included
Table Rows	100,000
File Storage	10 GB
Vector DB	2 GB
Live Chat Support	Included
Rate limit	1,000 API calls per second
Customer Success Manager	Included

Additional terms:

1. Once accepted by the Subscriber, this Proposal constitutes a valid Agreement governed by the Botpress Terms of Services.
2. The Subscriber declares that it is an entity operating a business or a non-profit enterprise, not an individual or a consumer. Except as expressly set forth herein, prices do not include applicable taxes, including, without limitation, value-added taxes, withholding taxes and sales taxes. Subscriber is solely responsible for paying to the appropriate taxation authorities any such tax on materials or services provided under this Proposal that may be applicable in jurisdictions where Subscriber is conducting its activities. If any withholding or deduction is required by law, Subscriber shall increase the payment so that Botpress receives the full amount stated in this Proposal. Subscriber shall provide Botpress with evidence of such withholding or deduction upon request.
3. Unless otherwise specified, all services are provided remotely.
4. Payment for software subscriptions and/or services is invoiced upon signing and is due within 30 days of the invoice date. All late payments will incur a fee of 1.5% per month (18% per annum).
5. The subscription will automatically renew annually for up to two (2) additional one-year terms as is unless cancelled by either party in writing at least forty-five (45) days before the anniversary date. Upon renewal, Botpress reserves the right to increase the price by up to 5% or CPI, whichever is highest.
6. LLM costs are the Subscriber's responsibility. These costs will be billed separately based on usage and can be paid either in advance via Order Form or monthly by credit card if preferred.
7. Case study: Within six (6) months after the solution's launch, Subscriber agrees to Botpress authoring a pre-approved case study featuring the company logo, showcasing the project, in the event that this fee is invoiced.
8. If Botpress has not met the Functional Delivery standard as defined in Exhibit A, Section 8 by April 14, 2026, solely due to Botpress's fault, the Subscriber will be entitled to a one-time credit of 1,495 USD. This credit shall be applicable to future invoices issued after April 14, 2026, excluding charges related to AI spend, and shall not be redeemable for cash or any refund.

Subscription Order Form

Exhibit A – Statement of Work (SOW)

MaxxBot – AI Procurement Intelligence Assistant

Document Version: v2.0 (Contract Exhibit Format)
Effective Date: January 15, 2026

Prepared For: Botpress Managed Services Team
Prepared By: ScaleX (Alex)
Project: MaxxBot – AI Procurement Intelligence Assistant
Tied to **BP-PO–202501191101**

Note: Any business metrics or roadmap statements labeled PROPOSED are informational only and are not acceptance criteria unless explicitly repeated in Section 8 (Acceptance Criteria).

---

1. Purpose and Scope

This document defines the functional and non-functional requirements for MaxxBot as delivered by Botpress under a Managed Services engagement. This document is intended to be incorporated as Exhibit A to the Order Form / SOW and used to align scope, acceptance criteria, and responsibilities.

In scope: Design, build, and delivery of a production-ready MaxxBot experience using Botpress (ADK) that can:

Query ScaleX-provided structured data tables

Analyze user prompts and uploaded documents

Return grounded, non-hallucinated procurement outputs across the capability set defined in Sections 5–7

PROPOSED (informational only, not acceptance criteria): MaxxBot may be used as a lead-generation and qualification tool for ScaleX's assessment services and may support future per-user subscription pricing.

Docusign Envelope ID: F28F22CF-C6A1-4BCA-9EB2-7177392DD0ED

2. Definitions

MaxxBot: The end-user chatbot experience delivered in Botpress, including agent logic, tools, and configured access to ScaleX data.

Database Tables: Structured datasets provided by ScaleX to power responses, including TBL-012 through TBL-015 (Appendix A).

Functional Delivery: A build that meets the Acceptance Criteria defined in Section 8.

Priority
- HIGH: Required for Functional Delivery
- MEDIUM: Required unless explicitly deferred in writing
- LOW: Optional

Hallucination: A response that asserts specific facts, figures, vendor attributes, benchmarks, or clause language that are not present in configured data sources or are not explicitly labeled as assumptions or placeholders.

---

3. Roles and Responsibilities

ScaleX Responsibilities
- Create, own, and populate all structured data tables, benchmarks, and methodologies
- Provide schemas, sample rows, and representative test data
- Define Golden Questions and validation scenarios
- Provide representative (sanitized) documents for testing

Botpress Responsibilities
- Implement agent logic, workflows, and grounding logic using the Botpress ADK
- Configure tools to query and compute outputs from ScaleX data
- Implement document ingestion, extraction, normalization, and analysis pipelines
- Implement user context memory, logging, feedback capture, and export functionality
- Perform reasonable performance tuning prior to Functional Delivery

---

4. Data Architecture Requirements

4.1 Current State Tables (Provided by ScaleX)

PROPOSED: MaxxBot will query approximately 11 structured tables totaling ~14,500 rows. Exact table names and row counts will be finalized during implementation.

4.2 Additional Tables (Provided by ScaleX)

Botpress will implement query logic and rule evaluation for the following tables (schemas in Appendix A):

- TBL-012: risksTable (~50 rows)
- TBL-013: methodologyTable (~25 rows)
- TBL-014: treatmentRulesTable (~100 rows)
- TBL-015: contractClausesTable (~75 rows)

Botpress will not author or modify table content unless explicitly requested in writing.

---

5. Functional Requirements

5.1 Core Chat Capabilities

- Rate Benchmarking (PRIORITY: HIGH)
  - Fuzzy matching on service names to taxonomy/service types
  - Location normalization and tier differentiation
  - Currency conversion with stated FX assumptions
  - Confidence indicator based on data availability
  - Expected Output: Benchmark range (low/median/high), unit, location, and brief market context.
- Vendor Intelligence (PRIORITY: HIGH)
  - Vendor profile lookup by name
  - Shortlisting by service type/location where data supports
  - Red flag identification based on configured data
  - Expected Output: Structured vendor profile including overview, capabilities, footprint, strengths, and red flags.
- Risk Assessment (PRIORITY: HIGH)
  - Scenario attribute extraction

    - Risk detection using risksTable criteria
- Severity assignment (LOW / MEDIUM / HIGH / CRITICAL)
    - Mitigation strategies grounded in configured data
- Treatment Recommendation (PRIORITY: HIGH)
    - Deterministic IF/THEN rule evaluation using treatmentRulesTable
    - Priority ranking and rationale
    - Explicit assumptions when inputs are missing
- Savings Calculation (PRIORITY: MEDIUM)
    - Estimated savings ranges using methodologyTable heuristics
    - Transparent assumptions and inputs
- Methodology Explanation (PRIORITY: MEDIUM)
    - Plain-language explanations of logic and calculations
    - No exposure of internal prompts

5.2 Document Processing Capabilities

- Proposal Comparison (PRIORITY: HIGH)
    - PDF/DOCX upload (up to 2 documents)
    - Extraction of pricing, SLAs, scope, and terms
    - Pricing normalization and benchmarking
    - Side-by-side comparison with negotiation opportunities
- Contract Risk Analysis (PRIORITY: HIGH)
    - Contract upload (PDF/DOCX)
    - Clause classification using contractClausesTable
    - Risk flagging and severity assignment
    - Recommended redline / negotiation language

---

6. User Experience and Operational Requirements

- Conversation Context Memory (PRIORITY: HIGH)
    - Persist user context across authenticated sessions
    - Allow reset/clear on request
    - Prevent cross-user context leakage
- Query and Response Logging (PRIORITY: HIGH)
    - Log prompts, tool calls, data sources, and responses
    - Provide admin access/export
- Feedback Capture (PRIORITY: HIGH)
    - Thumbs up/down on responses
    - Capture reason codes and optional comments
- Export Functionality (PRIORITY: MEDIUM)

Docusign Envelope ID: F28F22CF-C6A1-4BCA-9EB2-7177392DD0ED

    - Export responses or conversation segments to PDF/Excel

- Graceful Failure Handling (PRIORITY: HIGH)
    - Never return empty or broken responses
    - Clear error messaging and logging
- Demo / Example Queries (PRIORITY: MEDIUM)
    - Lightweight onboarding experience
    - Example prompts aligned to Golden Questions

---

7. System Requirements (Non-Functional – Performance)

Performance Targets (Best Effort)

Botpress will make commercially reasonable, good-faith efforts to optimize system performance such that:

- Standard conversational responses for typical knowledge-base and table-driven queries are generally returned within a few seconds
- Document analysis workflows provide visible progress feedback and complete within a reasonable timeframe for enterprise use

Performance Optimization Obligation

- Prior to Functional Delivery, Botpress will perform reasonable performance tuning and architectural optimization to ensure the system is suitable for live demos and early production use.

Clarification

- Performance targets are not strict service-level guarantees and are not contingent on specific millisecond thresholds.

---

8. Acceptance Criteria

- Functional Delivery is achieved when the following criteria are met using representative, sanitized test data:
    - Accuracy and Grounding
    - ≥90% of Golden Questions answered correctly
    - No critical hallucinations
- Capabilities Delivered
    - All core functional capabilities operate end-to-end
    - User context persists across sessions

    - Logging, feedback, and export features operational
- Usability and Readiness
    - System is demo-ready, usable, and suitable for early production use

Functional Delivery is based on correctness, usability, and demo readiness and is not contingent on strict latency thresholds.

---

9. Not Included in Phase 1 Unless Separately Agreed

The following are excluded unless added in writing. Botpress may include these as a bonus without affecting acceptance:

- Multi-language support
- Real-time external API integrations
- Direct procurement suite integrations (Coupa, Ariba, etc.)
- Custom dashboards beyond chat
- Native mobile apps
- Enterprise SSO beyond ScaleX-selected authentication

---

10. Data Ownership and Confidentiality

All ScaleX-provided data, benchmarks, and methodologies remain the exclusive property of ScaleX and may not be reused for other clients. NDA and DPA apply.
